

OUR VISION - JOIN THE REVOLUTION NOW!

Live-Concerts for everybody! Are you ready to rock?

Regular tickets have increased tremendously in price over the last years. The average ticket price today is three times more expensive than 20 years ago, making the attendance unaffordable for a large audience group.

Additionally, access to live concerts is limited by several further factors. Concerts are dominantly performed in selective large cities and economically sound countries leaving fans in rural areas or non popular countries behind.

The music industry could generate a substantial amount of higher revenues, if a larger audience could be reached!

Left alone fans around the globe are eagerly waiting for a way to experience state of the art live concerts at an affordable price.

WHAT IF...

- you could enjoy and afford concerts from all around the globe in REALTIME without even leaving your home?
• it was possible to sell an UNLIMITED amount of tickets for a live concert?
• you could choose your POSITION in the hall during a concert and even be ON STAGE right next to your favorite artist?
• you could let all your friends on SOCIAL MEDIA know, which concert you are currently watching?

ConcertVR took up the challenge and is proud to present an exciting blockchain based solution for a so far unsatisfying concert environment.

We already have a fully functional prototype...

WATCH DEMO

HOW CONCERTVR CAN MAKE YOUR LIFE BETTER

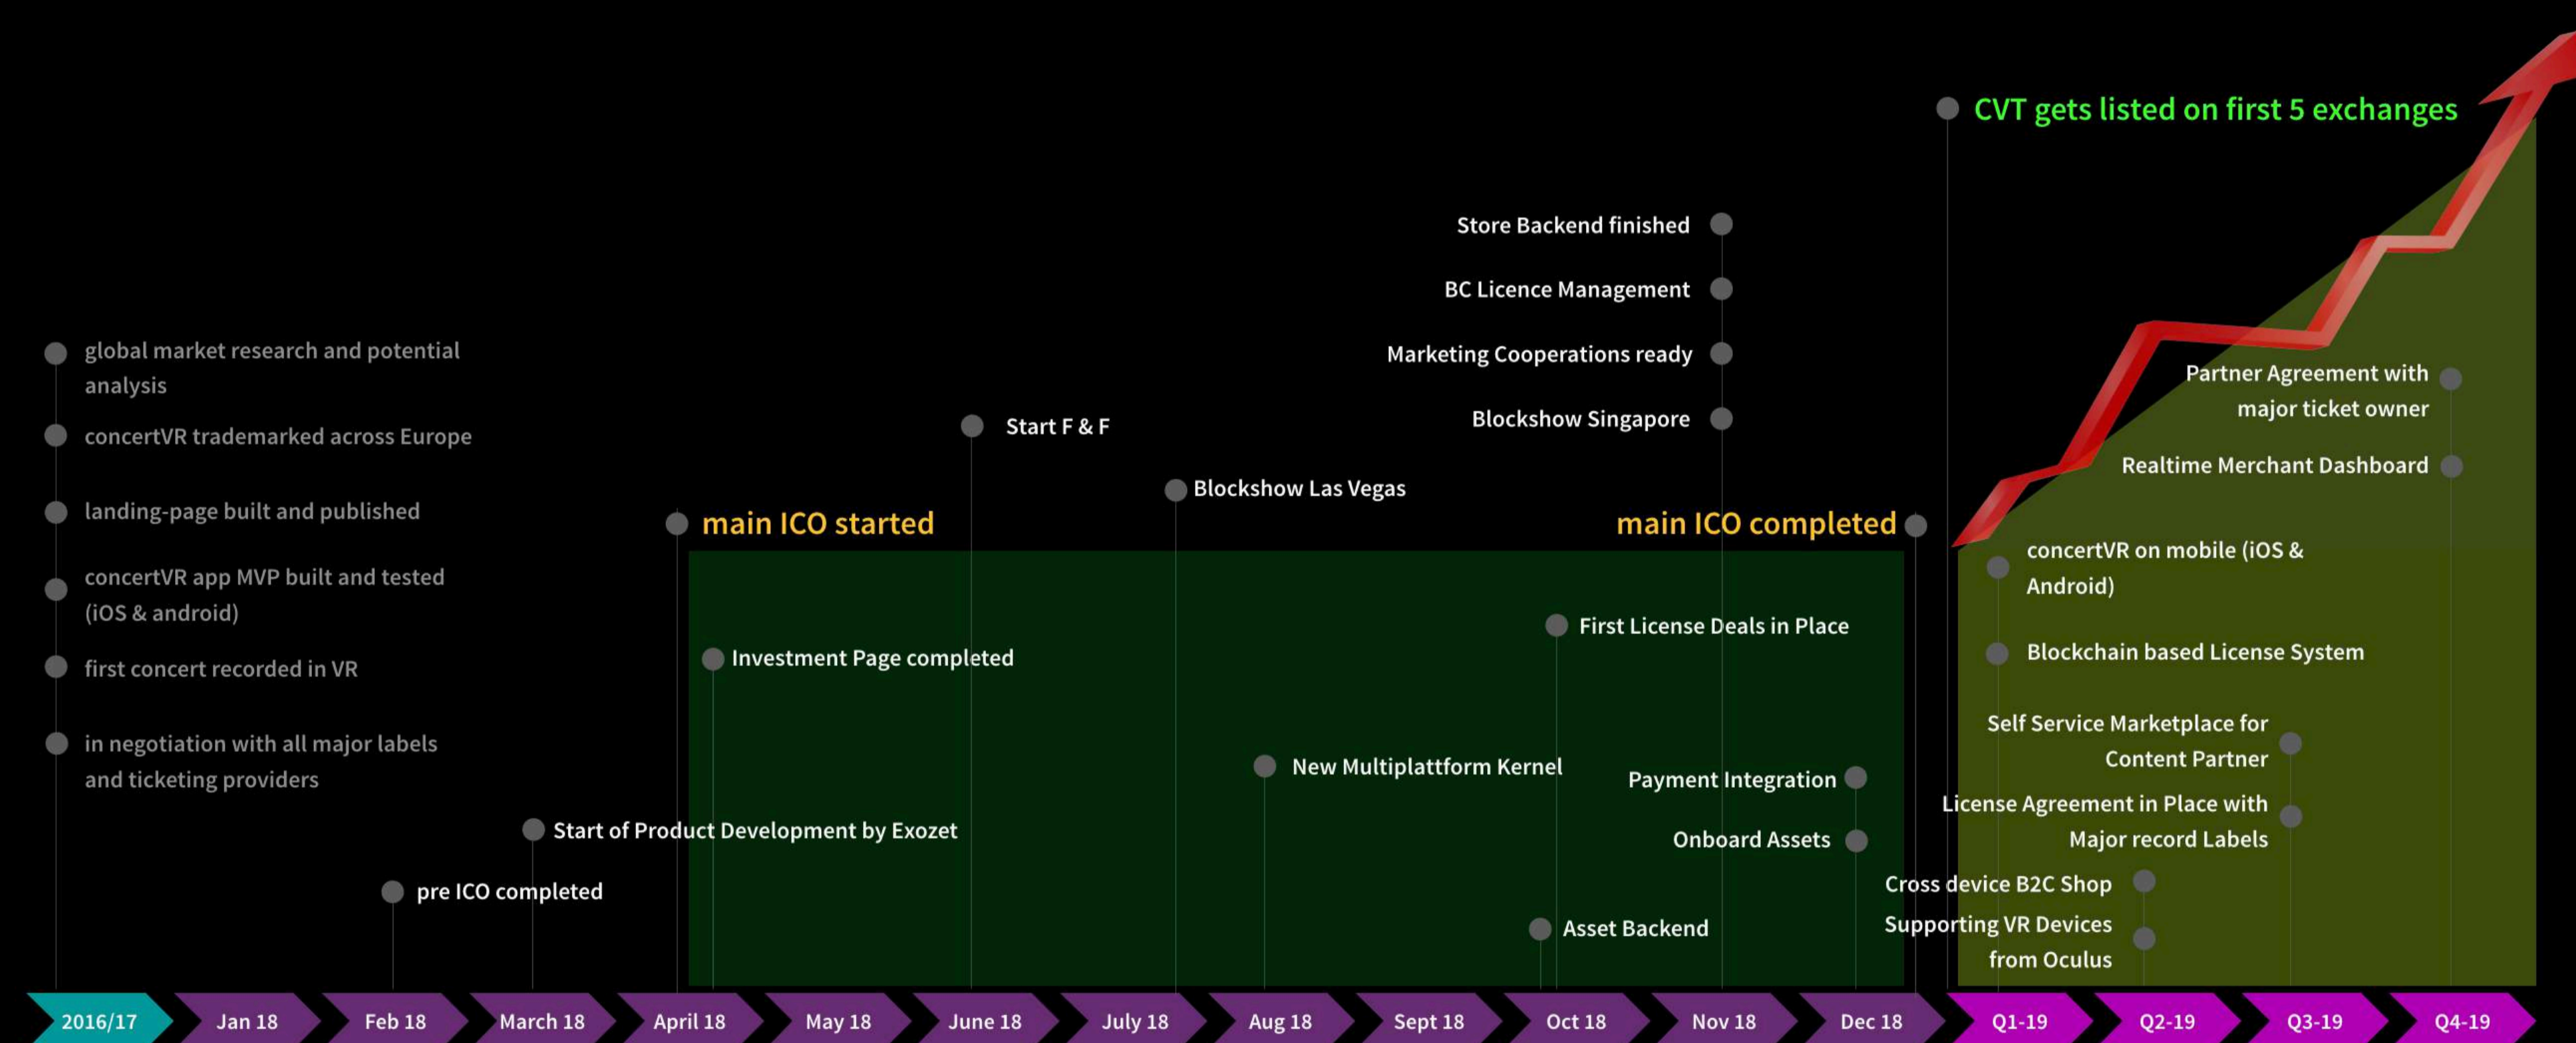

key features

- Enjoy real concerts in Virtual Reality - in realtime or on demand at a time of your choice
• Once purchased, enjoy your content across any platform - on your smartphone, VR glasses, browser or SmartTV
• Choose from different camera perspectives, where you want to experience the concert from
• Search different categories and find your favorite artists and acts
• Buy individual songs or entire concerts simply by in-app purchase
• Enter a coupon code and enjoy selected content for free
• Let your friends know which concert you are watching via social media
• Experience their reactions in realtime in the app
• Invite friends directly during the concert and chat with them

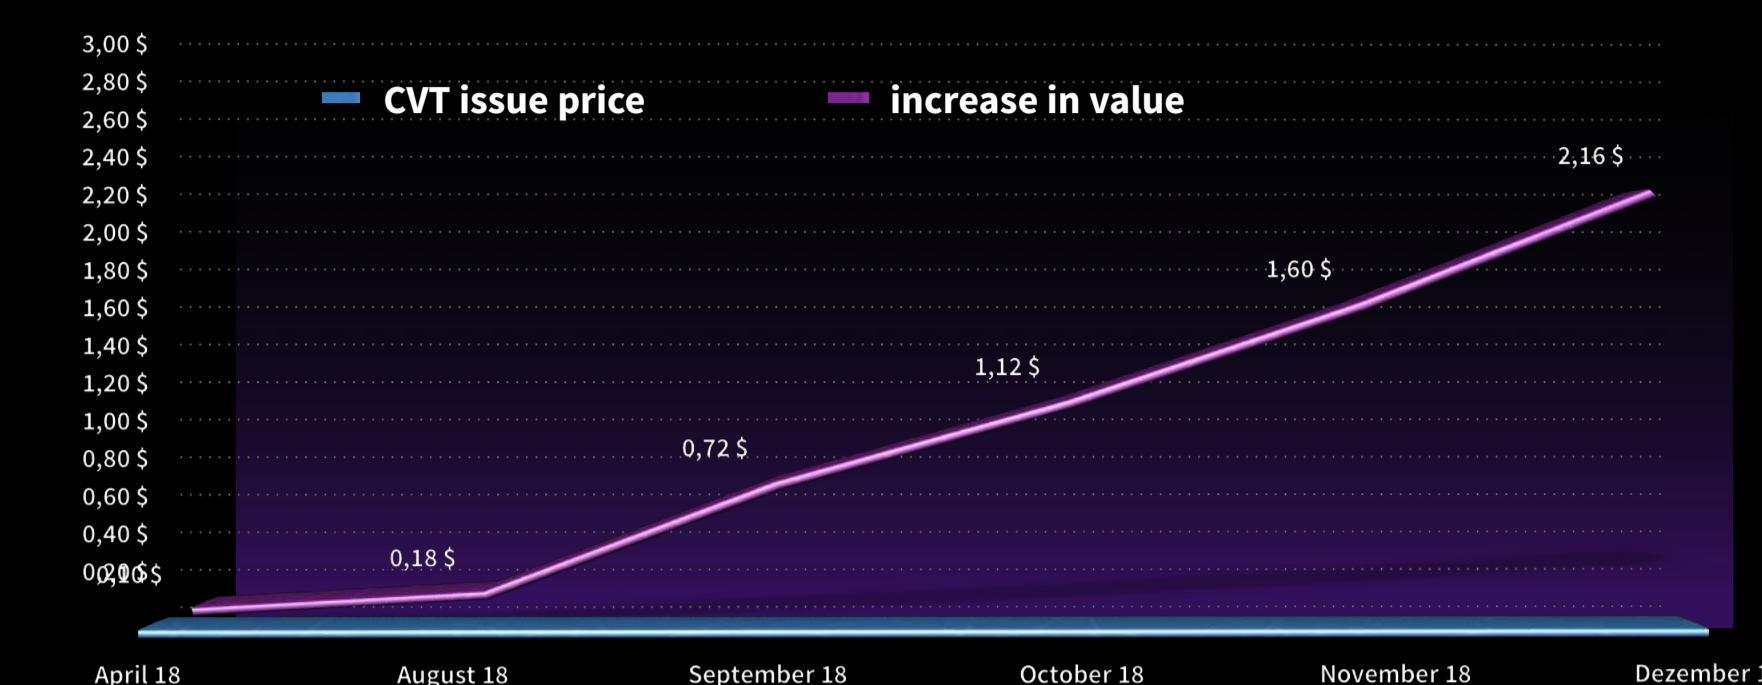

TIMELINE & MILESTONES

road to revolution

THE CONCERTVR TOKEN

We create a utility token that has to be used within our application to purchase content. In addition to fiat money, we will also allow a variety of other crypto currencies to purchase our token. We are firmly convinced that only an organically grown product and the widest possible community of satisfied users will ensure the value of our token.

SOLD OUT in 3 days & 16 hours!
